No More Ear Static

Donna Stevens

January 18, 2024

I had been sick with a cold that was causing an occasional **loud irritating static in my ear** when I needed to speak loudly or if the environment around me was too loud. During worship that Sunday I had to use ear plugs or leave the garage because the **static in my ear was constant**.

When **Pastor Rob called up those in need of healing**, I knew I needed to get up there right away. **He prayed for my ears to open, and I thought I felt a ‘pop’ like when you pop your ears to relieve pressure**.

Although the static did not go away immediately, I noticed **within an hour that I was not experiencing any static in my ear**. I did not experience any more static for 24 hours and only once the next day. After that, there was **no more static**.

Praise the Lord for my healing. No request is too small or big for our God. We just need to ask.

*Ask and it will be given to you;
seek and you will find;
knock and the door will be opened to you.*
(Matthew 7:7 NIV)
